ESI Integrity Anti-Fraud Technology Receives Lottery Industry Award

VANCOUVER, BC, April 23, 2007 - ESI Integrity Inc. (a wholly owned subsidiary of ESI Entertainment Systems Inc. (TSX:ESY)) today announced that it received a Smart-Idea Award for its *Integrity* Anti-Fraud Module at the Smart-Tech 2007 Conference in Las Vegas, Nevada. The Smart-Tech Conference is organized by the Public Gaming Research Institute (PGRI) and annually recognizes new ideas and technology that provide a distinctive impact to the lottery industry. The ESI *Integrity* Anti-Fraud Module was recognized in the New Technology category.

"We are very proud to be recognized with the PGRI Smart-Idea Award," said Alan Ahac, President of ESI Integrity Inc. "This award validates our efforts in bringing leading-edge technologies for risk management to the gaming industry."

The new ESI *Integrity* Anti-Fraud capability is based on proven AI technology for transactional pattern analysis, and automatic rules detection and generation. This capability has evolved from successful projects in stock trade monitoring and online technical support applications, and is well-suited for transactional pattern analysis and adaptive learning applications. These characteristics are central to the ability to monitor and detect many types of fraud, including sophisticated money laundering schemes. The integration of this functionality extends the range of potential fraud conditions that can be monitored by the ESI *Integrity* System, offering a premium risk reduction capability for the gaming industry. The *Integrity* Anti-Fraud module was developed in partnership with Aprecia, Inc. of Stamford, Connecticut.

The system is currently being implemented to monitor race wagering for RCI Integrity Services Inc., a national pari-mutuel monitoring service established by the US State Racing Regulators. Virginia Lottery will be the first lottery organization to trial the system.

With over 45 systems licensed world-wide, ESI Integrity Inc. is the leading provider of Continuous Monitoring Systems for government-regulated gaming. *Integrity* systems monitor – near in real-time - billions of dollars in annual wagering revenues for regulated gaming organizations.

About ESI Integrity Inc.

ESI Integrity Inc. is the leading supplier of independent software for Security and Risk Management in gaming. The ESI Integrity Continuous Monitoring System provides independent real-time monitoring of lottery and pari-mutuel gaming – auditing billions of dollars of gaming world-wide every year. ESI Integrity is currently licensed at over 45 lotteries and pari-mutuel wagering sites, spanning North America, South America, Europe, Asia, and Africa.
